

hülsta-HOMEOFFICE

The straightforward design of the **hülsta-HOMEOFFICE** catches the eye, and it is just this simplicity which gives it its special radiance. The hülsta-HOMEOFFICE desk collection is characterised by its straight forms, simplicity, innovations and its focus on practical features.

Extendable desk concept E - F: A desk collection in a variety of dimensions and functions which enables desk linking and round-the-corner combinations.

One can create an endless number of new configurations, such as single, team and group workplaces. The range also meets requirements of a wide range of different room sizes and shapes: it is possible to place the units centrally in the room as well as by a wall or in a corner. Everything imaginable is now also "do-able".

Additional units/accessories/functional units:

Mobile container with 3 drawers

All drawers with pull-out brake and **hülsta-SoftFlow**

Lower bookcase and lower drawer: for fitting below the table surface

Technical information and details on materials:

Cable management: In the desk E, cables can be fed vertically through a plastic tube. These table surfaces can also be provided with a cable aperture at 4 predetermined positions.

Standing/sitting workdesk F - adjustment mechanism: there is a gas pressure spring inside the column, which can be operated by means of a footswitch. This switch can be positioned at either side of the desk so that it is as easy to operate as possible. When the switch is operated (by pressing on it), it is possible to lower or raise the work surface by pushing or pulling the table surface by hand.

Closing the containers: there is an optional central locking system with the cylinder lock available. It is positioned in the top front section of the drawer on the right-hand side.

Brake mechanism: it is only possible for the user of the container to open one drawer at a time, to prevent the container from tipping over.

Further notes:

- There is no veneer matching for desk combinations
- The veneer direction of the standing/sitting workplaces cannot be changed
- GS sign (for tested safety) for the mobile containers

Extendable desk concept

Extendable desk concept E - F:

A desk collection in a variety of dimensions and functions which enables desk linking and round-the-corner combinations.

List of versions

Model no.	Versions	Price group
363	White lacquer	I
279	Structured beech	I
276	Alder	II
365	Oak mocca	II
278	Natural oak	II
376	Light brown ash	II
372	Cherrywood gold	II
377	Core walnut	II

All desk substructures available in 4 optional surface versions
All desks 72 cm high, with legs (adjustable in height by 4 mm)

Desk E

72.0 cm high; 80 cm deep

with a veneered or lacquered table surface, 2.6 cm thick (see list of versions on page 325)

Desk substructure: transverse strut made of steel, graphite powder-coated. The model number for the desk support panels and for the table surface must be stated separately, since colour combinations are possible. Please state this clearly in the order! When changing versions between different price groups, the higher price group is always charged. If no details about the version of the desk support panels are given in the order, the desk support panels are delivered in the same version as the table surface.

The extendable desk E (see below) can be fitted on to desk E.

140 x 80 cm	Price gr. I II	3547 - -
