

KAI

design Shin Azumi
2006

An unfussy, rigorous design characterized in particular by the unconventional curvature the back rest follows.
Produced in stool and chair versions, with or without armrests, in lacquered or upholstered wood, to suit diverse requirements.

design Shin Azumi
2006

Stackable chair and armchair with base in sandblasted stainless steel Aisi 304, feet in polythene with felt. The curved plywood seat is available in several finishes, with soft leather seat pad on request or totally upholstered in fabric. It is complemented by a height adjustable swivel stool with sandblasted stainless steel column and round base in steel with « linen fabric » pattern. Seat in several finishes, also with seat-pad or upholstered in fabric or leather.

use and maintenance instructions

Clean all parts in wood, leather, fabric and metal with a damp cloth or a diluted neutral cleaner. Do not use cleaners with alcohol, bleach, solvent or abrasive products. Any liquid spill on the product must be wiped up immediately. When lifting or moving the product, hold it on the structure and not under the seat. The product should not be subjected to unbalanced weights, as it is designed for a proper rest on the foothold (on four legs or on the base). Our company relieves from any responsibility in case of damage caused to fragile floors. Avoid any improper use of the product: do not step on the product, on the footrest or on the armrests. Avoid any movements that could compromise the proper functionality of the product or the safety of the users. Wood and leather, being natural materials, could be easily damaged. Small impurities or imperfections are within quality standard range. Do not expose the product to weather conditions or atmospheric agents, nor to heat sources over 45°C. Also products for outdoor use could be afflicted by atmospheric agents. The product could undergo possible exterior changes due to particular exposure to heat, humidity and saltiness. An appropriate and frequent maintenance and cleaning of the product enhances its durability. The product could change colour and shade, if exposed to direct sunlight. Maintenance has to be carried out by experienced staff. Dispose of the package only after assembling the product, in order to avoid the loss of ironmongery and components. Once the product has been dismantled, the product itself or its components must be given to the public garbage disposal system, according to the legislation in force.
