

It looks refreshingly simple and yet there are still lots of functional surprises to be found in now! spin. Nothing is fixed: units that can be turned around convert a wall unit into a desk in a jiffy or allow you to look at things on your tablet when cosily tucked up in your bed. The integrated storage units inside the cupboard can also be converted – simply remove them, turn them around and recombine them!

- Since 1996, we are entitled to label all of our modular furniture and base frames with the strictly regulated "Blue Angel", which awards products that are low in emissions and especially environmentally friendly.

kiri wood
the power of nature

The future is light – and robust.

The extraordinarily light but robust wood from the Asian empress tree that is also growing in Europe – called kiri in Japanese – makes it easier to realise new ideas. The solid wood core of kiri embodies the intrinsic values of modern furniture from hülsta. Timeless design and a high level of craftsmanship transform this sustainable raw material into excellent units of furniture with which hülsta once again demonstrates its responsibility towards resources.

Kiri has proven its worth in the manufacture of surfboards, musical instruments and kimono wardrobes, hülsta has even fitted out cruise liners with it, and now it is starting to be used in furniture manufacture – for a lot of good reasons. This light wood is the perfect material for intricate processing techniques, for design objects that appear to be hovering by a wall and for units that need to run smoothly.

Quality:

Kiri is an inherently stable and solid natural material for creating durable units with low warpage.

Safety:

Kiri is well-equipped by nature – it is flame and fire resistant, and also resistant to moisture, decay and parasites.

Flexibility:

Kiri can be processed intricately and successfully. A high level of variety in design can be achieved by combining it with veneers and HPL coatings.

Sustainability:

Kiri saves weight and therefore carbon dioxide in the transport of raw materials and products. The wood of the empress tree regrows particularly quickly and is both robust and durable. By combining kiri wood with some fine genuine wood veneers we reduce the volume of valuable wood resources consumed.

Lightness:

Kiri is a true lightweight for logistics, production and assembly. This natural material enables us to create new architectural forms – and units from kiri wood are easy to fit on walls.

Please be sure to see the „now! general“ chapter on the following subjects:

- Important notes on including lighting
- Remote control set for LED lamps
- IR repeater set for lowboards

● ● ● made in germany

Important note:

Because orders are read automatically, the correct type number of the required unit should always be stated in the order. Please note when ordering!

Planning notes

Planning lowboards / sideboards / highboards

Planning step 1

Choice of unit
in the required version

Planning step 2

Choice of optional modules
in the required version

Note:
Modules should be fitted with some lowboards/sideboards/highboards. The modules can be turned through 90° on the lowboard/sideboard/highboard.

Planning step 3

Choice of optional bridges
in the required version

Planning step 4

Choice of optional accessories
such as:
- LED lamps for bridges
- Box drawers for modules
- USB/socket set

Planning wardrobes / wall units / bookshelves

Planning step 1

Choice of unit
in the required version

Planning step 2

Choice of optional accessories
such as:
- Fitted shelf for wardrobe
- Box drawers for wall unit
- Shelf module
- Hallway module
- Box drawers for bookshelves
- Bookrests for bookshelves

Planning a bed combination

Planning step 1

Choice of bed
in the required version and size

now! spin beds always incl. base frame and anti-slip mat

Planning step 2

Choice of optional accessories
such as:
- Upholstered headboard for beds
- Bed drawers
- Room divider rear wall for consoles
- Box drawers for consoles

Planning step 3

Choice of floor modules/of multi-functional table
in the required version

Floor modules must always be fitted on a metal sub-structure.

Possible arrangements

Important note:

Because orders are read automatically, the correct type number of the required unit should always be stated in the order. Please note when ordering!

Sketch raster for the
now! spin range

Type list

Please superimpose unlined paper and write firmly. In order to avoid slipping, use two paper clips or fold the edge of the drawing sheet.

Check list

- 1.) Do the **sketch** and the **order** match? Do the **dimensions** and the **sketch** match the type number? Are all **type numbers** correctly stated in the sketch? Can one see the position of **door hinges**?
- 2.) Are all **type numbers** correct? Have you perhaps confused **price and type numbers**?
- 3.) In combinations of **wooden and lacquer versions**: is it clear which units are to be delivered in which version?
- 4.) Is it clear whether the types ordered are to be employed as **wall units** or as **plinth units**?
- 5.) Are the **accessories** such as fitted shelves for wardrobes etc. included in the sketch?
- 6.) Is this an **additional order**? If so, when was the **original order**? If possible, include a sketch on which the existing and new units are clearly marked.

Please also remember the planning notes on the introductory pages!
